

Thermalux Gourmet Cooker

**Hand built by experienced Australian craftsman
to achieve a quality and individuality not
possible by mass production.**

The Gourmet Cooker heats, cooks and provides hot water for all the family's needs when fitted with the optional hot water jacket-wet back. It offers a large space heating capacity, up to 180m², a good sized oven with a self-cleaning glass door with thermometer and a huge top cooking surface.

The firebox being directly below the cook top gives excellent hotplate temperatures and the higher position of the firebox makes loading of fuel a breeze.. no bending down!

The Gourmet is best placed in the lounge, dining or family room as a space heater and can also be sited in the kitchen as a cooker if desired. The unique venting system makes for easy control of oven temperatures for all cooking requirements.

Available in five standard colours: moss green, blue, golden fire brown charcoal and metallic black, with a crisp, clean chrome trim with optional splash back also available, as is brass trim. Mojave red is also available at a small additional charge.

The firebox is large and super responsive. The oven comes standard with oven rack and tray. The Gourmet will burn coal, but is more suited to burning wood, having both top and bottom air controls.

The Gourmet is also available in a central heating model – Gourmet CD - with a boiler output of approximately 15kw - more than enough to heat the average three bedroom home.
